

LUxxxByyy Fiber Patchcord

Description:

Lumics offers high quality fiber optic multimode patch cables for high power applications.

The cables are metal armored and terminated with SMA905 or D80 connectors. Fiber length, core diameter, NA and other features are custom specified. The fiber core is precision centralized within the ferrule of the connector.

Features:

- Special high power connector on request
- Planar or Free standing fibers
- NA 0.1 to 0.49
- Core diameters 50 to 2000µm
- Cables are designed according to customer specifications
- Metal protective tube
- Metal tube with outer Silicon tube

Benefits:

- On stock
- Data sheets
- Tested
- Cleaning accessories available

Applications:

- High power Material processing
- Medical
- Pumping
- Remote Illumination
- Reflective Sensors
- Laser welding, soldering
- Scanning, counting, monitoring

User Safety
